5. Replace Engine Coolant
6. Replace Rear Differential Fluid
7. Flush Brake Fluid System
8. 9-Speed Transmission Service
- \* Power Steering Fluid

## Maintenance Q&A

- Q.** How does the Honda Maintenance Minder work?
- A.** The maintenance minder system shows engine oil life in the information display to let the owner know when it is time to have the engine oil replaced and regular engine maintenance done. There is no longer a maintenance schedule in the owner's manual. The system shows engine oil life as a percentage, which drops over time as the vehicle racks up miles. It starts out at 100% with fresh engine oil, and winds down to 0%, signaling the oil life is over.
- Q.** How does the Maintenance Minder know when the 0% trigger occurs?
- A.** The system counts down oil life based on engine operating conditions (both normal and severe). The on-board computer continuously monitors engine operating conditions such as speed, engine temperature, ambient temperature, time, and vehicle use to determine when an oil change and regular maintenance is necessary.
- Q.** How do I operate the system?
- A.** The Honda Maintenance Minder is very easy to use. As the on-board computer continuously monitors your vehicle, it provides continuous information on the remaining engine oil life left - simply depress the Select/Reset knob on the information display and you will see use progression.
- When the on-board computer determines that your vehicle has reached 15% of remaining life, it will turn on the Maintenance Minder light for you. In addition, each time the vehicle is started, the information center will default and automatically display the percentage of remaining life. To return to the odometer/trip meter, simply depress the Select/Reset knob.
- Q.** What happens to the Maintenance Minder if I do not perform maintenance when the remaining life gets to 0%?
- A.** If you do not perform the recommended maintenance, the display will start to show negative mileage. This indicates how many miles that the vehicle is past due for service.

## Typical Inspection Periods

- ✓ 15,000-miles or after one year
- ✓ 30,000-miles or after two years
- ✓ 60,000-miles or after four years
- ✓ 90,000-miles or after six years
- ✓ 120,000-miles or after eight years
